## HOW TO OPEN THE CLASP ON A PANDORA ESSENCE BRACELET

1 Hold the bracelet firmly in both hands and find the groove located above the letters 'NDO' of the word PANDORA inscribed on the clasp.

2 Place your thumb nail into the groove, push down and pull apart both sides.

3 Once the clasp is open, lift out the end of the bracelet.

4 With the bracelet now open you can begin threading your PANDORA Essence beads.

## HOW TO THREAD BEADS ONTO YOUR PANDORA ESSENCE BRACELET

1 Open your PANDORA Essence bracelets clasp and hold the pointed end of the bracelet.

2 Thread your first PANDORA Essence bead onto the bracelet.

3 Pull the bead into position.

4 Because each bead has a silicone insert the bead grips to the bracelet and does not move when out of position when worn.

5 Once all of your beads have been added, simply close the clasp securing the bracelet onto your wrist and you're ready to go.

## FINDING THE PERFECT FIT

When you purchase your first PANDORA bracelet, you must first measure your wrist with the addition of your index and middle finger. This will usually add around 2cm to the circumference of your wrist. The reason why we suggest that you add this extra length is because as you add charms to your bracelet, the gap between the bracelet and your wrist will close, fitting the bracelet closer to your wrist.

## HOW TO ATTACH CLIPS ONTO YOUR PANDORA MOMENTS BRACELET

Clips are designed to fit onto the threaded nodes in the centre of your PANDORA Moments bracelet.

By adding them onto your bracelet, you are providing a balance across the bracelet, so as the bracelet naturally gives it will do so evenly.

1 Find the groove on your clip.

2 Firmly prize apart the two sides of the clip while forcing down on the groove.

3 Place the clip on to the threaded node on the bracelet.

4 Firmly close the clip once it is positioned evenly.

Once both clips have been attached, your bracelet will now be balanced and will secure your beads in place.

# HOW TO ADD A SAFETY CHAIN TO YOUR PANDORA<sup>®</sup> MOMENTS BRACELET

“PANDORA safety chains work as a great support mechanism to keep all of your charms on your bracelet, and your bracelet on your wrist. But how do you attach them correctly?”

The tools you will need.

**1** Find the end of the safety chain with the rotating hinge attached. This will be the end that you will thread onto the bracelet first.

**2** Once the bracelet is open, position the safety chain onto the end of the bracelet where the thread is visible.

**3** Twist the safety chain onto the bracelet and past the threaded end.

**4** Once the threading has started, the safety chain will not slide off.

**5** Keep on threading the safety chain past the other two threaded markers.

**6** Eventually you will come to the last threaded node, at this point you will want to thread the safety chain on until it cannot go any closer to the clasp.

**7** Attach the second end of the safety chain onto the end of the bracelet. This will twist on exactly the same as the hinged end.

**8** Place the end of the bracelet into the clasp and close firmly.

And finally, your charms and bracelet are now safe and secure on your wrist.

## WHAT'S THE DIFFERENCE BETWEEN PANDORA ESSENCE AND MOMENTS?

"The PANDORA Essence bracelets have a much smaller chain than the PANDORA Moments bracelet."

*PANDORA Essence beads are much smaller than PANDORA Moments beads and charms. They also have a smaller hole to thread the chain through. Inside this tiny hole, there is also a silicone grip so that the bead remains in place on the bracelet.*

## HOW TO OPEN THE CLASP ON YOUR PANDORA BRACELET

**1** Find the deep groove on the clasp positioned between the 'A' and 'P' of the word PANDORA. Then firmly push your nail into the groove and pull apart each side.

**2** Once the clasp is open, you will then see two ends nestled in the clasp. One of these ends will gently lift out exposing the end to thread your beads onto.

**3** With the ends now exposed, you are now ready to start threading your beads.

# HOW TO THREAD BEADS ONTO YOUR PANDORA MOMENTS BRACELET

“When threading your PANDORA charms onto your bracelet, you will notice that there are two different ways to thread them.”

*Some of the charms will simply pass each threaded node with ease.*

*However some require twisting past each one and will not move freely.*

*This is simply down to design and does not reflect the authenticity of each charm.*

# HOW TO USE THE PANDORA CLASP OPENER

*The tools you will need.*

**1** Place the lock opener into the groove on your PANDORA clasp.

**2** Gently push and twist the opener.

**3** Eventually your clasp will open allowing you to lift the two ends apart.
